

CONFERENCE PAPER – ASEE (AMERICAN SOCIETY OF ENGINEERING EDUCATORS)

*Mrs. Tiffany Coulson - The abstract you submitted to the 2018 ASEE Annual Conference & Exposition , Engineering for Rural Students: Learning then Earning Digital Badges (Fundamental, Diversity), has been **approved**.*

REVIEWER COMMENTS

“Great topic - I am very interested in the results - basically whether "digital badges" are something that will motivate rural students in an informal learning environment to achieve and connect such students via remote means into a network.”

“ I appreciate the focus on students from rural, culturally-diverse communities. It seems as though the badge program has kept in mind how to build on the resources that students bring from their communities, which is fantastic.”

CURRENT STATUS OF STUDY IMPLEMENTATION

- 1 – Working with Dr. Dan Hickey on an NSF grant.
- 2 – Will partner with Flite Test and Quincy, Tonasket, Oroville and Wenatchee to design digital badges.
- 3 – Portfolium will be the communication platform
- 4 – Pipeline project from middle school to CTE in Wenatchee college, Big Bend and WSU Extensions.
